

Painted Glass

Preedy Glass offer a complete professional survey and installation service of PreColour painted glass wall panels, or glass tops.

Bathrooms and Kitchens can be transformed by having large pieces of glass manufactured and installed onto complete walls in a bathroom, on bath surrounds, in between worktops and cabinets in a Kitchen, and painted to a RAL or BS colour of your choice, to give a clean, modern and contemporary look.

A standard finished clear float glass painted white gives an aquamarine look, or where a specific colour is required, low iron glass is painted for a near perfect colour match.

Basin tops, or worktops can be manufactured in thick glass, including CNC machined cut outs for a highly polished finish to accommodate hobs and sinks, and to avoid seeing the plumbing through the glass, the underside can be painted to an agreed colour.
