

Shower Enclosures

Preedy Glass offer a complete professional survey and installation service of frameless glass shower screens, doors and enclosures.

Pretuff toughened safety glass in clear, acid etched or sandblasted and decorated to your bespoke design, can be supplied with highly polished edges. For an extra clear look with higher transparency, low iron glass can be used.

Architectural ironmongery from our Prefit division is supplied from stock. Hinges, knobs, handles, clamps, towel rails and channels are available in various finishes including polished chrome, matt chrome, gold plated, nickel plated and polished brass. Translucent seals are supplied to reduce water seepage.

Where side panels are not fitted to the ceiling, a reinforcement bar in a matching finish can be installed to give the enclosure added stability.
