

Toughened Glass Assemblies

Preedy Glass offer a complete professional survey and installation service of PreTuff toughened safety glass.

Interior clear frameless glass doors used instead of timber doors brings light and a feeling of spaciousness to an area.

Pre-acid satin acid etched frameless doors give privacy with a sleek modern look, and are typically used for Bathroom and WC doors.

Sliding glass doors are primarily used where space is at a premium. Typically used to act as a room divider, or for wardrobe doors, these are usually top hung, with the track hidden into the ceiling if the design calls for the mechanism, and fascia not to be seen.

Foyers, shopfronts, and entrances can become virtually frameless, using our Predit extensive range of ironmongery, including patch hinges, handles, floor springs, locks and brackets. Clear toughened glass is used for doors, side-lights and transoms, and manifestations can be provided by film, vinyl or permanent sandblasting or etching.

Glass balustrades can be supplied and installed complete with a wide-ranging selection of brackets in a large number of finishes for in-fill panels.
